Performance Task
Hardware and Software in Action

Objective:

At the end of the exercise, the students should be able to:

- Use multimedia to illustrate the basic essential functions of an IS hardware/software.

Requirements:

- Internet Connection
- Microsoft Word
- Video Recorder

Instructions: (2 items x 30 points)

1. Choose one (1) IS hardware and one (1) contemporary application software to highlight.

2. Record a video of the hardware and software application while discussing three (3) of their main functions. Screen recording is allowed to highlight the application.

3. The videos must be free from background noise and focus on specific functions.

4. The maximum length total should not exceed five (5) minutes. Combining the videos in a single file is optional.

5. Summarize each video in at least five (5) sentences using MS Word.

GRADING RUBRIC:

Performance Standards	Points
The student highlighted three functions of their chosen hardware/software.	15
The video presented is audible and free from background noises.	5
The video did not exceed five (5) minutes in length.	5
The student summarized the video in at least five (5) sentences.	5
TOTAL	**30**
